EDUCATION

Master of Science – Computer Science

Georgia Institute of Technology

Expected Graduation: **12/2028**

Atlanta, GA

Bachelor of Science – Computer Science

Iowa State University

Graduated: **05/2026**

Ames, IA

EXPERIENCE

Software Engineer

IBM

08/2026

Poughkeepsie, NY

- Incoming backend engineer working on IBM Z mainframe systems and distributed services

Software Engineer Intern

Buildertrend

05/2026

Omaha, NE

- Full-stack development using React + TypeScript and C# (.NET) for fintech product features

Software Engineer (Capstone)

Perpendo AI

01/2026 – 05/2026

Des Moines, IA

- Built React and TypeScript frontend features for document review, submission tracking, and structured underwriting data
- Developed Python backend APIs for document upload, processing, and delivery of data to frontend workflows
- Integrated AWS Lambda, API Gateway, S3, and DynamoDB to support document ingestion and application data handling

Software Engineer Intern

Marshalltown Company

05/2025 – 05/2026

Marshalltown, IA

- Designed a full-stack pallet-packing system with C#, JavaScript, SQL, and Docker, deploying it across 7 fulfillment centers
- Implemented a .NET Core backend with RESTful APIs and packing algorithms, increasing space utilization by ~20%
- Used inventory data for 20,000+ tools with C# and SQL Server, scaling databases for accurate, location-specific records
- Built interactive 3D container visuals with Three.js, HTML/CSS, and Blazor enabling rotation and zoom of the items

PROJECTS

AnchorFlow | TypeScript, React, C#, MongoDB, Tailwind CSS, AWS, Docker, Git

01/2026

- Developed a crypto dashboard using React + TypeScript with a C# backend, to visualize real-time pricing and track assets

convertfile.me | JavaScript, Node.js, Express.js, MongoDB, Vercel, HTML/CSS

08/2025

- Built a file-conversion web service using Node.js and Express, supporting 10+ formats, and used MongoDB for analytics

RESEARCH EXPERIENCE

Undergraduate Research Assistant

Software Analytics and Pervasive Parallelism Lab (SwAPP)

08/2024 – 01/2025

Ames, IA

- Integrated automated dataset-labeling tools using Tree-sitter, Python APIs, and NumPy, reducing labeling time ~60%
- Refined a SciPy pipeline for 10,000+ data points, improving clustering accuracy and reducing runtime by ~30%

Research Intern (Mentored Projects)

DePaul DICE Lab

05/2024 – 08/2024

Chicago, IL

- Created a Python and NumPy pipeline to process Docker container logs, increasing log processing efficiency by ~40%
- Launched Docker container interfaces with CDMT (Merkle trees) and Git, improving reliability and recovery time by ~35%

SKILLS

Languages: C#, Java, Python, JavaScript, TypeScript, SQL, JSON, HTML/CSS

Frameworks: React, .NET, Node.js, Express, Tailwind CSS, Three.js, Blazor

Databases: PostgreSQL, MongoDB, DynamoDB, Microsoft SQL Server, MySQL, LINQPad

Tools: Git (GitHub, GitLab), Docker, AWS, CI/CD (GitHub Actions), Postman, REST APIs
